

AFIF UR RAHMAN

MERN stack Developer

+92 (315) 669-0902 afifurrahman444@gmail.com LinkedIn GitHub Lahore, PK

SUMMARY

A results-driven MERN Stack Developer with 3+ years of experience building scalable **mobile** and **web applications**. Specialized in **Next.js**, **MERN Stack**, and **TypeScript**, with strong expertise in developing high-performance, user-focused solutions across both frontend and backend. Experienced in designing and implementing end-to-end applications, integrating APIs, and **optimizing** application execution. Proven ability to deliver **production-ready** solutions, contribute to complex projects, and collaborate effectively within cross-functional teams. Recognized for strong **problem-solving** skills, adaptability, and a proactive approach to modern development practices in fast-paced environments.

EXPERIENCE

MERN Stack Developer

Invosquare

Jan/2025 Present Lahore, PK

- Led design and development of scalable web applications using React Native, Next, React, and Node.js with Express.
- Designed and optimized MongoDB for performance and security.
- Built and maintained RESTful APIs and microservices architecture, improving modularity and scalability.
- Mentored junior developers and enforced best coding practices, boosting team productivity.
- Collaborated with stakeholders to create clear technical documentation supporting knowledge transfer.

Web Developer

Hasbisoft

Sep/2023 Dec/2024 Lahore, PK

- Developed responsive web applications using HTML, CSS, JavaScript, and React.
- Engineered RESTful APIs using Node.js and Express, significantly improving performance, reducing system load, and enhancing scalability.
- Improved app operations by improving front-end code and refactoring bottlenecks.
- Ensured application security using JWT and OAuth for user authentication and authorization.
- Supervised version control using Git and GitHub.

EDUCATION

Bachelor of Science in Information Technology

Islamia University Bahawalpur

2019 2023 Bahawalpur, Pakistan

PROJECTS

Vault Top Security

Links: [Android App](#) [iOS App](#)

- Built a secure file-vault backend using **Node**, **Express**, and **TypeScript** with **3-step** authentication (PIN, secret word, pattern) and progressive logout.
- Implemented file management features, including **upload**, **preview**, download, deletion, category **filtering**, and admin tools for user/file management and credential updates.

YallahNshooof

Links: [Android App](#) [iOS App](#)

- Refined backend for cross-platform marketplace app using Node, Express, and TypeScript, enabling users to **buy**, **sell**, and **rent** items across real estate, automotive, and consumer goods with integrated peer-to-peer **messaging**.
- Applied **real-time** chat and **customer support** channels, and handled **RESTful APIs**.

INTERESTS

Coding and Software Development

Deeply passionate about creating innovative software solutions that improve life and enhance business operations.

System Architecture Design

Interest in developing efficient, future-ready architectures that maximize operational efficiency.

Agile Process Improvement

Driven by the challenge of refining agile methodologies to enhance team productivity and software quality.

SKILLS

LANGUAGES

English (Fluent)

Urdu (Native)

PetzApp

- Created **RESTful APIs** using **Node.js**, **Express**, **TypeScript**, and **MongoDB**, implementing JWT authentication, OTP verification, password reset, and complete user profile management.
- Built scalable backend modules for **pet profiles**, **posts**, **media uploads**, **likes**, **reports**, and **notifications**, with well-structured MongoDB schemas.

Restaurant

Links: [Dashboard](#)

- Developed a **role-based** restaurant management system in Next.js with panels for **Restaurant Owners**, **Chefs**, **Waiters**, **Accountants**, and **Admins**, each featuring tailored dashboards and permissions.
- Reinforced **order management**, **menu** and **employee management**, **table assignments**, and **real-time kitchen workflows**, with analytics dashboards using **ApexCharts**.
