

Afif Ur Rahman

Full Stack Developer

+92 (315) 669-0902 | [Gmail](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Lahore, PK

SUMMARY

Full Stack Developer with 3+ years building scalable web and mobile applications. Focused on Next.js, Node.js, and TypeScript, with hands-on experience across the full stack — from API design and database architecture to polished, production-ready frontends. Comfortable owning a feature end to end, mentoring teammates, and working closely with stakeholders in fast-paced, agile environments.

EXPERIENCE

Full Stack Developer | Jan 2025 – Present

Invosquare | Lahore, PK

- Led development of scalable web and mobile applications using React Native, Next.js, Node.js, and Express
- Designed and optimized MongoDB schemas for performance and data security
- Architected a microservices-based REST API layer, improving modularity and system scalability
- Mentored junior developers and established coding standards that improved team productivity
- Collaborated with stakeholders to produce clear technical documentation for knowledge transfer

Web Developer | Sep 2023 – Dec 2024

Hasbisoft | Lahore, PK

- Developed responsive web applications using React, JavaScript, HTML5, and CSS3
- Engineered RESTful APIs with Node.js and Express, reducing system load and improving performance
- Refactored front-end code to eliminate bottlenecks and streamline application operations
- Implemented JWT and OAuth authentication to secure user access and authorization
- Managed version control and code reviews across the team using Git and GitHub

PROJECTS

The Conqueror Developers | *Next.js, TypeScript, Node.js, Express, MongoDB, Zustand* | [Live](#)

- Developed a super-admin dashboard for a real estate platform covering customers, properties, payments, receipts, and leads
- Implemented real-time financial calculations for received, outstanding, hold, and overdue amounts on every unit
- Designed custom and installment payment plans with auto-generated schedules and printable A4 receipts and statements
- Configured role-based access control for Super Admin, Admin, and Accountant using Next.js middleware and layout guards
- Automated email notifications for new leads, receipts, and OTP verification via non-blocking background jobs

Vault Top Security | *React Native, TypeScript, Node.js, Express, MongoDB* | [Android](#) | [iOS](#)

- Developed a secure file-vault app with three-layer authentication (PIN, secret word, pattern) and progressive logout
- Implemented cross-device cloud storage so files and credentials stay synced after login on any device
- Integrated in-app previews and playback for images, audio, and video, with category filtering by type
- Designed soft-delete with restore, and automatic permanent deletion once the retention window passes
- Created admin tools for managing user files and updating credentials

PetzApp | *Node.js, Express, TypeScript, MongoDB*

- Developed the backend with JWT authentication, OTP verification, password reset, and full profile management
- Designed MongoDB schemas for pet profiles, posts, media uploads, likes, reports, and notifications

YallahNshoof | *React Native, TypeScript, Node.js, Express, MongoDB* | [Android](#) | [iOS](#)

- Developed a marketplace app for buying, selling, and renting houses, apartments, cars, and other items
- Implemented smart search and filters by category, location, and price for fast discovery
- Integrated live Google Maps location tracking for every listing
- Created an in-app chat feature so buyers and sellers can negotiate and close deals directly
- Designed favorites and profile management for a more personalized experience

Restaurant | *Next.js, TypeScript, Node.js, Express, MongoDB, ApexCharts* | [Dashboard](#)

- Developed a role-based system with dashboards for owners, chefs, waiters, accountants, and admins
- Implemented live order tracking with status updates, filterable by date, week, or month
- Designed QR-code table ordering with AI-assisted menu suggestions based on dietary preferences
- Automated stock management with deduction on order completion and wastage tracking
- Created an analytics dashboard with revenue metrics and interactive charts

EDUCATION

Islamia University Bahawalpur | Bahawalpur, Pakistan
Bachelor of Science in Information Technology | 2019 – 2023

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3
Frameworks/Libraries: React, React Native, Next.js, Node.js, Express.js, Redux, MobX, Zustand, Context API, Bootstrap, Tailwind
Databases: MongoDB
Real-Time & APIs: REST APIs, Web Sockets, socket.io, WebRTC
Developer Tools: Git, GitHub, Postman, Jira, AWS, CI/CD
Practices: Agile/Scrum

LANGUAGES

English (Fluent) | Urdu (Native)
